Alessandro Rosa
frontend developer

I'm an Italian frontend developer. I love to solve problems by design and build beautiful web applications, using the latest technologies and best practices. I enjoy spending time learning about new technologies, always striving to try new things to improve my work and the work of my teammates.
Currently, I mostly write code in Javascript but I'm always open to future possibilities and changes.
I'm also a downhill rider, an indie games player, a traveller and an INTP type person.

● Work Experience

Full-stack Developer Freelance — March 2016 / Present

I'm currently Working on some freelance and open source projects using the latest JS technologies such as ES6, Node, Express, React and its ecosystem, CSS Modules.

I'm also studying TDD and functional programming to improve my skill and knowledge and becoming a better developer.

Frontend Developer Workup S.r.l. — September 2014 / March 2016

Lead frontend developer at Workup, I've worked on the most complex parts of clients's websites and web applications using frameworks and techs such as jQuery, AngularJS, Wordpress, Laravel (Blade template engine).

I've also developed a series of internal CLI tools with Node, Grunt and Yeoman to improve the company productivity and websites performances while supported my collegues on writing JS & CSS code.

I've used tools & methodology such as Vagrant, Git, Git-flow, Atlassian Jira & Bitbucket, Agile Development and introduced them rest of the team to them.

I've developed several JS utility and jQuery plugins, also designed and developed a full SASS / JS framework for the agency's new CMS. I've worked with the rest of the team to develop custom solutions for companies like MB Crusher, Inghirami, Motovario, Tescoma and many others.

Web Designer Workup S.r.l. — August 2013 / September 2014

Web Designer at Workup. During this period I've made a lot of wireframes, prototypes, designs and code for responsive websites and web applications by working with companies like Porsche, Veneta Cucine, Controls Group, System Group, Airlux, Douglas Perfumeries.

I've used Photoshop, Illustrator, Wordpress, HTML5, CSS3, SASS, jQuery, Bootstrap and Foundation on daily basis.

Electronics Technician Energia Europa S.p.A. — July 2010 / July 2013

Energia Europa is a company that make energy saving system. The machines are controlled by a remote through a web application. As technician I was responsable of the remote control systems, data collection and analysis, preparation of test documents.

In also maintained the company main website and designed/developed a few websites for distributors.

Junior Web Designer / Developer Freelance — July 2010 / July 2012

I've designed and built websites for small clients using CMS such as Wordpress and Joomla on my spare time.

● Educations

Aldini Valeriani Sirani Highschool — 2009

Industrial Engineer in Electronics and Communication
